

fink Restaurant & Suites

ENVIRONMENTAL AND SUSTAINABILITY POLICY

3 | Year 2024

fink Restaurant & Suites is passionately committed to adopting best practices in ecological and social sustainability, working alongside EarthCheck, the world's leading provider of benchmarking and certification.

Our establishment, consisting of 9 elegant suites and an in-house restaurant, is located in the historic old town of Brixen. Guests can relax in our small Thermae, equipped with a Finnish sauna, steam bath, and Roman hot and cold water pools. Additional relaxation is provided by a quiet room with a carefully curated library. Our restaurant opens its doors to external guests from Tuesday to Saturday, offering continuous warm dishes from 12 PM to 9 PM as part of our monastery cuisine. The charming old town of Brixen offers a variety of cultural experiences, while the nearby Dolomites, a UNESCO World Heritage Site, hold great significance for us.

At fink Restaurant & Suites, we recognize that our activities can have potential negative impacts on the environment and society if not conducted responsibly. Therefore, we have implemented an environmental management system that meets the EarthCheck Company Standard.

Our goal is to continually improve, measured through annual benchmarking assessments. The fink team actively works to minimize our ecological footprint. We implement sustainable initiatives aimed at improving business performance, reducing energy and water consumption, and minimizing waste production.

We are committed to complying with all relevant laws and regulations while also striving for international best practices. Our head of operations has been appointed as the EarthCheck Coordinator to optimize the sustainability performance of our company. Special attention is given to employing and empowering local talent, and where possible, we source sustainable products and services based on Fair-Trade principles from the surrounding area.

We encourage our employees to actively communicate our commitment to ecological and social sustainability to all relevant stakeholders, including guests, suppliers, and the community.
